

NEW YORK'S NEW RULER.

COMING EVENTS FORESHADOWED AT THE STATE CAPITAL.

What Mr. Robinson will say, and what he will do, is a subject of much interest to the people of this State. He is expected to make a speech on Monday next, in which he will announce his views on the various questions which are before the Legislature.

Mr. Robinson, the Governor elect, has a double preliminary duty to discharge. He must make his annual report as Governor, and also his report as Governor elect.

The recent appointments in regard to canal and prison reform, the Governor with new and important powers. I refer to the appointment of a Superintendent of Public Works and a Superintendent of State Prisons.

Some legislation is absolutely necessary to put these new departments in running order. The Legislature must give authority to the various officers and departments.

It is not believed that the Governor has yet fixed his mind on any particular course of action. He is still in a state of uncertainty as to what he will do.

There are the Superintendents of the Banking and Currency, the Superintendent of the Canal and Navigation, the Superintendent of the Prisons, and the Superintendent of the State Prisons.

It is believed that the Governor will not try to do more than to see that the various departments are properly organized and that the various officers are properly appointed.

How Heron's Successors are Treated. The employees of the Third Avenue Railroad are being treated in a very unfair manner by the new administration.

THE CONSPIRATORS HESITATING.

Republican Senators who may not do the bidding of Chandler, Morton & Co.

WASHINGTON, Dec. 21.—The opinion very generally prevails among leading Democrats that the leaders of the Republican party begin to show signs of faltering.

It is also true that there is something in the air which portends public disaster to the Republican party. The sky is brightening.

Republican side of the Senate is still a unit on this question. Some Republican Senators hold that the President of the Senate has the right to appoint and remove officers.

Some of the Republican Senators are beginning to waver. They are not so sure of the right of the President of the Senate to appoint and remove officers.

It is believed that the Republican party will not be able to hold together on this question. There is a growing feeling of dissatisfaction.

The Republican party is being divided by the question of the right of the President of the Senate to appoint and remove officers.

DID WE HAVE A FAIR VOTE?

THE SEARCH FOR FRAUDS IN AND NEAR NEW YORK CITY.

An imposing array of witnesses who had not heard of any Election Irregularities—The who Knows Every Man in Jersey City. The Congressional Committee examined Samuel Mitchell of East New York yesterday.

He was at the polls on election day, he said, and saw persons voting who, he knew, were residents of Brooklyn, and were not entitled to vote in New Lots.

He knew a block of buildings that has been vacant for months, except just before election. Most of the persons that moved in then just before election were men. They voted in New Lots.

He said that he had seen a man who had been in the city for some time, and who had been seen at the polls on election day.

He said that he had seen a man who had been in the city for some time, and who had been seen at the polls on election day.

WELLS'S CONFESSION.

How he bulldozed the Returns of Twenty-Two Precincts.

NEW ORLEANS, Dec. 21.—Ex-Gov. Wells appeared before the House committee this morning. He was again asked for the original returns and records. He did not refuse to produce them, but sought to evade the demands.

A part of the records, specifically receipts for consolidated returns, had been produced. He was asked to produce the original returns and records.

He said that he had seen a man who had been in the city for some time, and who had been seen at the polls on election day.

He said that he had seen a man who had been in the city for some time, and who had been seen at the polls on election day.

He said that he had seen a man who had been in the city for some time, and who had been seen at the polls on election day.

SHALL WOMEN PREACH?

A NEWARK CLERGYMAN ANSWERS PAUL'S ADMONITION.

Suggesting that the Apostle was not Addressing the People of the Nineteenth Century—The Assembly in the Second Presbyterian Church of Newark, at its resumption of the trial of the Rev. Isaac M. See for permitting and encouraging women to preach and teach in his pulpit, was larger than on the preceding day.

Not that the number of delegates had increased. There were certainly fewer of them than on Wednesday; but women had ministered in extraordinary force to hear Brother See's defence.

He said that Mrs. L. F. Robinson, who preached from his pulpit on the morning of Sunday, Oct. 19, and Mrs. C. S. Whitney, who officiated similarly on the evening of the same day, were delegates to the Women's Temperance Convention in Newark.

OREGON'S DEMOCRATIC ELECTOR.

The Hon. E. A. Cronin in Washington—What he has to say on the Situation.

WASHINGTON, Dec. 21.—E. A. Cronin, the interesting Oregon elector, arrived here this morning, and was on the spot for the hour or so, being generally introduced and receiving many congratulations.

He is himself a gentleman of the reputation for integrity is second to none in the Western country, and what he did was in accordance with his conscientious convictions, after consultation with eminent legal authorities.

MIXING MILK AND WATER.

THE BOARD OF HEALTH FIGHTING FOR ITS LACTOMETER.

Judge Sutherland's Patience nearly Exhausted—Hebbling the Lawyers and Commissioners the Jury—Science in the Scales. The first witness yesterday in the continued trial of Daniel Sutherland, on charge of dealing in watered milk, was President Henry Norton of the Stevens Institute of Technology.

He testified that the use of hydrometers in determining the proportion of water in fluids is common among chemists as well as in many kinds of manufacture. The similar instrument employed by the Board of Health in testing milk, called lactometers, fully meet the requirements of scientific examination.
